CGTMSE — RAG Practice Document

Purpose

This sample document is created specifically to test a local Retrieval-Augmented Generation (RAG) system. It contains simple facts that the system should later retrieve and use to answer questions.

What is CGTMSE?

CGTMSE stands for Credit Guarantee Fund Trust for Micro and Small Enterprises. The scheme is designed to support eligible micro and small enterprises by providing credit guarantee support to lending institutions for eligible credit facilities. The guarantee reduces the lender's credit risk; it is not the same as giving a grant directly to the business.

Who may benefit?

Eligible micro and small enterprises seeking qualifying credit from participating lending institutions may benefit, subject to the scheme's current eligibility rules, lender assessment, and applicable terms.

Important test facts

Question	Answer contained in this document
What does CGTMSE stand for?	Credit Guarantee Fund Trust for Micro and Small Enterprises.
What is the main purpose?	To provide credit guarantee support for eligible credit facilities.
Is it a direct grant to a business?	No. It is a credit guarantee mechanism.
Who may benefit?	Eligible micro and small enterprises, subject to applicable rules and lender assessment.

RAG testing note

For the first software test, the Python program should successfully open this PDF and print its text. Later, the same document will be chunked, embedded, stored in Chroma, and used to answer questions through OmniRoute.
